

CHARLES & COLVARD®

Created MOISSANITE

Shapes and Sizes Chart

Charles & Colvard Created Moissanite® Carefully and precisely hand-faceted, each Charles & Colvard® jewel is cut according to exact angles and proportions designed especially for moissanite to maximize its brilliance and enhance its incredible fire.

All carat weights expressed in comparable millimeter (mm) sizes to scale; approximate moissanite average carat weights and approximate diamond equivalent weights. Facet count includes the culet, even if it is actually a point.

This is the Official Charles & Colvard Shapes & Sizes chart. Please update your chart to coincide with this chart.
Any deviation from the sizes of the gemstones noted on the chart will not be supported by Charles & Colvard.

ROUND BRILLIANT

58 Facets

(1.3 mm – 2.4 mm, 42 facet melee sizes available, SRB only. Melee is sold per carat in any carat increment desired, quantities are an approximate count.)
